Hawthorn (*Crataegus monogyna*), rich in flavonoid complexes, promotes cardiovascular health.*

This plant is cultivated from Aboca's organic farms. Systematic quality controls implemented throughout the entire production process and analytical testing performed on raw material and finished product validate the safety and effectiveness of this herbal supplement.

Though total flavonoids are considered among the main ingredients of Hawthorn, many other plant components contribute to the herb's efficacy. That is why Aboca has developed the exclusive W.P.C.

W.P.C. (Whole PhytoComplex Concentrate) is a combination of the freeze-dried extract with micronized powder from the same portion of the plant, to assure maximum bioavailability, optimum concentration of active principle and the full-spectrum of constituents.

The result is a product with uniform content of total flavonoids without the use of excipients, colorings, flavorings, or preservatives. GMO free.
